OBJECTIVE

Final-year B.Tech Computer Science and Engineering (Data Science) student seeking a Software Engineering internship. Strong programming foundation in Java and Python, hands-on experience designing and deploying REST APIs and full-stack applications, and a solid grounding in data structures, databases, and version control.

EDUCATION

Bachelor of Technology – Computer Science and Engineering (Data Science) 2023 – 2027
Swarnandhra College of Engineering and Technology, 4th Year
CGPA: 9.11

TECHNICAL SKILLS

- **Languages:** Java, Python, SQL
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Linux/CLI
- **Web & Backend:** Flask, REST API Design, Postman
- **Databases:** MySQL, MongoDB
- **Tools & Practices:** Git/GitHub, Version Control, Streamlit, Jupyter Notebook

PROJECTS

Credit Card Approval Prediction — Flask, REST API, scikit-learn [GitHub](#)

- Designed and built a full-stack web application with a Flask REST backend and responsive HTML/CSS frontend, exposing endpoints for real-time credit approval predictions with confidence scores.
- Identified and fixed a data-integrity bug (target leakage) by redesigning the data pipeline and re-engineering the prediction target from raw records, improving reliability of the deployed service.
- Benchmarked Random Forest and Gradient Boosting classifiers via RandomizedSearchCV and served the best-performing model through the API.

Sales Forecasting & Demand Intelligence System — Python, Streamlit [GitHub](#)

- Engineered an end-to-end data pipeline processing 4 years of retail transaction data (9,800 orders), benchmarking three forecasting model architectures (SARIMA, Prophet, XGBoost).
- Built and deployed a multi-page interactive web application (Streamlit) to Streamlit Community Cloud, serving forecasts, anomaly detection, and product segmentation views.

Employee Attrition Prediction — Python, scikit-learn [GitHub](#)

- Built and evaluated multiple classification models (Logistic Regression, Random Forest, Gradient Boosting) on a 1,470-record dataset with a modular, reproducible codebase.

INTERNSHIP EXPERIENCE

Data Science Intern – Xylofy AI (Virtual) May 2026 – July 2026 [Certificate](#)

- Built and deployed end-to-end data pipelines and applications across retail, real estate, and HR domains, including a forecasting service and interactive dashboards.

AI & ML Intern – Smartbridge [Certificate](#)

- Built a Credit Card Approval Prediction model and REST API, applying data preprocessing, testing, and end-to-end deployment practices.

AI & Cloud Technologies Intern – Edunet Foundation [Certificate](#)

- Gained hands-on exposure to cloud fundamentals and AI-driven application development through guided projects.
