

KAKI SANDYA

[Mail](#)[Contact](#)[LinkedIn](#)[GitHub](#)

OBJECTIVE

Final-year B.Tech Computer Science and Engineering (Data Science) student seeking a Data Visualization / Data Analytics internship. Skilled in turning raw, multi-source data into clear, interactive dashboards using Power BI, Tableau, and Python – with hands-on experience across retail, healthcare, and energy domains.

EDUCATION

Bachelor of Technology – Computer Science and Engineering (Data Science) 2023 – 2027
Swarnandhra College of Engineering and Technology, 4th Year
CGPA: 9.11

TECHNICAL SKILLS

- **BI & Visualization:** Power BI (DAX, Power Query), Tableau, Plotly, Streamlit, Excel
- **Data Analysis:** EDA, Statistical Analysis, Data Cleaning, Data Wrangling, Correlation & Trend Analysis
- **Programming & Querying:** Python, SQL
- **Libraries:** pandas, NumPy, Matplotlib, Seaborn, scikit-learn
- **Database & Tools:** MySQL, MongoDB, GitHub, Jupyter Notebook

PROJECTS

Global Energy Trends Dashboard — Power BI [GitHub](#)

- Built a Power BI dashboard analyzing 7+ years of global energy data, visualizing consumption, production, and trend shifts across regions and energy sources.
- Used DAX measures and Power Query transformations to clean and model multi-source energy datasets into an interactive, drill-down report.

Heart Disease Risk Analysis Dashboard — Tableau, Flask [GitHub](#)

- Analyzed 4,500+ patient records to identify key heart disease risk factors and built interactive Tableau dashboards across age, BMI, and lifestyle indicators.
- Extended the dashboard with a Flask layer to serve live data, improving data accuracy through cleaning and validation.

Sales Forecasting & Demand Intelligence System — Python, Streamlit [GitHub](#)

- Analyzed 4 years of retail sales data (9,800 orders) to uncover seasonal trends, anomalies, and product demand tiers via clustering.
- Designed a 4-page interactive Streamlit dashboard (forecasting, anomaly monitoring, segmentation) with Plotly visualizations, deployed to Streamlit Community Cloud.

Employee Attrition Analysis — Python, Matplotlib, Seaborn [GitHub](#)

- Analyzed the IBM HR Analytics dataset (1,470 records) to visualize and identify key attrition drivers – overtime, income, and work-life balance.
- Delivered HR-focused visual insights and retention recommendations through clear, stakeholder-friendly charts.

INTERNSHIP EXPERIENCE

Data Analytics Intern – Smartbridge (Power BI) [Certificate](#)

- Built global energy trend visualizations by analyzing over 7 years of data using Power BI.

Data Analytics Intern – Smartbridge (Tableau) [Certificate](#)

- Developed a heart disease risk analysis dashboard in Tableau and extended it with a Flask data-serving layer.

Data Science Intern – Xylofy AI (Virtual) May 2026 – July 2026 [Certificate](#)

- Built and deployed an interactive Streamlit dashboard for sales forecasting, anomaly monitoring, and demand segmentation.
